

# Mission Trips

[josiahventure.com/missiontrip](https://josiahventure.com/missiontrip)

Are you searching for a high-impact missions experience this summer?

Students in your group will share the gospel in English to peers cross-culturally. They will be challenged in their faith, coming face to face with clear questions about the difference Jesus makes in their own lives.

Your group will serve at camp with young people from a country in Central and Eastern Europe, and help them connect to a local church through relational evangelism and discipleship.

As a summer missions team leader, you will have the opportunity to watch God shape and motivate your students as they practice making disciples who make disciples.

## **TEAM DYNAMICS**

A team can consist of high schoolers, college students, and/or adults. Team members should demonstrate humble servant hearts, confidence interacting with youth, a desire to share their faith, and have the ability to bring energy and fun throughout the day at camp. An ideal team size is 8 to 10.

## **LOCATION**

Central and Eastern Europe

## **CAMP DATES**

We offer 10 to 17 day opportunities between the end of June and early August. Our desire is a three-summer commitment from your church to make the most of the relationships you will build—focusing on the European church youth leaders, their ministry team, and the non-Christian students.

## **EXPENSES**

Cost varies from country to country and covers housing, meals, transportation, and camp costs. Airfare is separate.

## **TRAINING**

Each team leader is responsible to prepare their team. Josiah Venture will provide training materials, as well as additional on-site training upon arrival for camp, and debrief upon departure.

## **POST TRIP**

After you return home, your team can continue to impact students through social media. The local church will follow-up and disciple campers, leading them into a growing relationship with the Lord.
